## To Whom It May Concern:

We switched our collections company to Medical Revenue Recovery Services (MRRS) one year ago and could not be happier. What first struck me about MRRS was their competitive rate along with a different approach to collecting money. MRRS uses more personable techniques that have produced better results in just a short amount of time. Jeff and Jean's attention to detail and personal concern for your account makes you feel as if you are their only account.

I would recommend MRRS for those who desire to improve their revenue management program. MRRS takes a "let us prove to you our worth" approach which is very refreshing and they have been able to back up their statements with dollars back into our company.

Should you have any questions regarding MRRS please feel free to call me at the number listed below.

Respectfully,

Daniel Shumate  
Chief Administrative Officer  
Louisiana Cardiology Associates
